DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 3, 5, 8, 11-15, and 17-26 drawn to antisense compounds and methods of targeting manganese superoxide dismutase, classified in class 514, subclass 44.
- II. Claims 2, 3, 5, 8, 11-15, and 17-26 drawn to antisense compounds and methods of targeting copper and zinc superoxide dismutase, classified in class 514, subclass 44.
- III. Claims 2, 3, 5, 8, 11-15, and 17-26 drawn to antisense compounds and methods of targeting catalase, classified in class 514, subclass 44.
- IV. Claims 2, 3, 5, 8, 11-15, and 17-26 drawn to antisense compounds and methods of targeting phospholipid glutathione peroxidase, classified in class 514, subclass 44.
- V. Claims 2, 3, 5, 8, 11-15, and 17-26 drawn to antisense compounds and methods of targeting cytosolic glutathione peroxidase, classified in class 514, subclass 44.

The addition of new claims in the instant application which seek to claim the targeting of multiple targets necessitates the following restriction requirement.

Pursuant to 35 U.S.C. 121 and 37 C.F.R. 1.141, the multiple target sequences recited in claims 6 and 7 are subject to the restriction set forth below. The Commissioner has partially waived the requirements of 37 C.F.R. 1.141 and will permit a reasonable number of such nucleotide sequences to be claimed in a single application. Under this policy, up to 10 of

Art Unit: 1635

independent and distinct nucleotide sequences will be examined in a single application (see MPEP 803.04 and 2434).

The instant claims are drawn to multiple targets and antisense directed thereto. The instant target sequences are considered to be unrelated, since each target sequence claimed is structurally and functionally independent and distinct because each target sequence has a unique nucleotide sequence. Furthermore, a search of more than one (1) of the target sequences claimed in the above listed claims presents an undue burden on the Patent and Trademark Office due to the complex nature of the search and corresponding examination of more than one (1) of the claimed target sequences. In view of the foregoing, one (1) target sequence is considered to be a reasonable number of sequences for examination. Accordingly, applicants are required to elect one (1) sequence for searching.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and because a search for art against one group would not necessarily return art against another, restriction for examination purposes as indicated is proper.

Claims 6 and 7 link(s) the inventions of Groups I-V. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 6 and 7.

Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional

Art Unit: 1635

application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
